DEVELOPMENT SECRETARIAT.

No. D. 7711—*Geol.* 39-28-6, *dated* 21*th*—24*th January* 1929.

The following draft amendments which the Government propose to make in exercise of the powers conferred on them under section 8 of the Mysore Petroleum Regulation, I of 1923, to the Rules framed thereunder and issued with Notification No. I. C. 5415—Geol. 103-22-14, dated the 13th March 1924, are hereby published for the information of the persons likely to be affected thereby, and notice is hereby given that the said draft will be taken into consideration on or after 1st March 1929 and that any suggestions or objections which may be received from any person or persons with respect to the said draft before the date aforesaid will be considered by Government.

Draft Amendments.

In Chapter I of Part II of the said Rules :—

For Rules 6, 7 and 8, the following shall be substituted :—

"6 Every tank or other receptacle for the storage of petroleum in bulk except a tank or receptacle which is not of sufficient capacity to contain 10,000 gallons of petroleum and is so situated as not to be liable to cause danger in the event of the petroleum being ignited, shall be electrically connected with the earth in an efficient manner by means of not less than two separate and distinct connections placed at opposite extremities of such tank or receptacle and the roof and all metal connections of such tank or receptacle shall be in efficient electrical contact with the body of such tank or receptacle.

Explanation.—A tank or receptacle shall be deemed to be so situated as not to be liable to cause danger in the event of the petroleum being ignited if it is not in close proximity to any other tank or receptacle or to any building not forming part of the installation and if it is surrounded by a wall or embankment or sunk in an excavation, the enclosure thus formed being sufficient to contain the whole contents of the tank or receptacle.

7. Not less than once in every year the connections and contacts referred to in Rule 6 shall be inspected and tested by the General Electric Inspector of the Mysore Electrical Department who shall be given every facility for such inspection by the licensee of the tank or receptacle. The General Electric Inspector shall conduct the tests in such manner as may be prescribed by the Chief Electrical Engineer and prepare a report of the result in

duplicate. One of the copies shall be furnished to the licensee and the other submitted to the Chief Electrical Engineer who shall forward it without avoidable delay with his remarks to the Director of Industries and Commerce for record.

8. The fee payable for tests carried out under Rule 7 shall be Rs. 10 a year for each connection, but shall not exceed Rs. 50 for any number of connections relating to one receptacle. In case the test discloses an unsatisfactory connection, and the need for rectification, the licensee shall nevertheless be liable to pay the prescribed fee and be likewise liable to pay a fee at the same rate for every subsequent test which may be necessary till the connections are passed by the Director of Industries and Commerce on the report of the General Electrical Inspector.

By Order,
N. RAMA RAO,
Secretary to Government,
Development Departments.

LAW SECRETARIAT.
